

# Lab-360

## Sample Identification & Labeling

The process begins by identifying the sample source, recording key details, and generating a QR code label.

## Submission to Laboratory

The sample is submitted, scanned, and anonymized with a new QR code for confidentiality.

## Assignment & Preparation

The sample is assigned to chemists and instruments, with detailed records kept during preparation.

## Testing and Validation

Chemists test samples, enter results, and the lab in-charge reviews and validates, retesting if needed.

## Result Reporting

Final test results are available for download as Excel or certificate, with separate reports if tested multiple times.
