Welcome to our company

Desks from the
Directors of
Primawave

“Revolutionize software development with a collaborative AI platform. Seamlessly integrate user feedback, automate testing, and deploy updates in real-time. Empower developers with intuitive tools and customizable workflows. Elevate efficiency, quality, and user satisfaction while reducing time-to-market. Transforming the way software is built, one line of code at a time.”

ABOUT OUR COMPANY

Primawave Software Private Limited is the leading technology service providers spanning the software development, IT and engineering sectors. We have been registered as startup India to make sure we'll give you the Innovation to the socially and are to be found wherever innovation is critical.

Primawave's Solutions and Products are supported by the robust, 85+ years old legacy of Mitra SK, in Inspection and Testing of Minerals and Ores. This gives Primawave innovations, valuable insight into the challenges and needs of the industry and to meet stringent compliances for various applicable standards. The highly experienced Quality Assurance Team of MSK consults Primawave for creating standard-compliant industrial or laboratories IT solutions for sampling collection preparation and testing.

OUR COMPANY VISION

Our system caters to a diverse set of customer needs and is designed to be adaptable and agile. It enables higher loads of job volumes at a cost-effective rate aided by effective AI predictive analytics enabling a seamless job procedure.

The adaptability of our system allows us to develop personalized solutions to clientele. Channelling knowledge from the three pillars of the organization - our laboratories, our experience in mechanically automated sampling, and our transparent and agile IT system, we are able to explore possibilities, agree to solutions, deliver excellence, and assure future cooperation.

INNOVATION. ANYWHERE. ANYTIME.

The global economy is changing how things are made and done. Big companies now need to be flexible and quick. They need to know a lot and be able to move easily. We understand this, so we're making a resource for companies. Our high-tech solutions help products at every step, from start to finish, making sure they're successful.

Primawave partners with top global innovators, offering high-tech solutions for quick, custom competitive advantage. Our tailored services ensure successful projects, from planning to maintenance.

COMPETITIVE ADVANTAGE

We set high standards for quality and work on it every day. Our Continuous Improvement Process (CIP) is part of every step we take, and we value feedback. We use client surveys and regular audits to maintain our professional processes. With a great work environment, we deliver the best performance for our clients.

BEST PRODUCTS BY US

1

Vessel & Non-vessel management system

2

LAB 360 - LIMS as per any accreditation body (Mineral, Food & Environment)

3

PORT 360 - Stock Monitoring at Port

4

FLOW 360 - Supply Chain Automation

5

Sampling, testing, surveillance for Domestic Commodity

6

QRTrax - Logistics Truck Monitoring

IoT SOLUTIONS

Comprehensive IoT Solutions: We provide complete IoT systems for industries, enhancing efficiency and automation.

Custom IoT Development: Tailored IoT solutions to fit specific business needs, ensuring seamless integration and data use.

IoT Product Innovation: Developing advanced IoT products for smart devices, remote monitoring, and predictive maintenance.

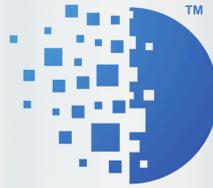

Scalable IoT Infrastructure: Flexible IoT platforms that scale with business growth, from small to enterprise-level.

Expertise in IoT Security: Strong security measures to protect data and devices, ensuring compliance with global standards.
